

Dear Sirs

I am writing to support XM Radio's right to broadcast local traffic and news information.

Having been an avid radio listener for the better part of my life, I recently switched to XM Radio service. I couldn't be more pleased with the selection and high quality of service I currently receive.

Not allowing XM Radio would be akin to not allowing Digital TV or Cable Stations to provide local stations to their customers. If local stations choose not to improve or compete against the quality and service XM Radio offers, then they have no right to be in business.
